

Manage Admin Roles in Mimecast

Last Modified on 12/11/2019 3:41 pm GMT

In order to ensure only users who need it have access to the Administration Console, you must first assign a user an admin role. The role assigned also defines what changes that user can make.

Mimecast provides several default roles for you to choose from. It is also possible to create custom roles should the need arise.

Only the Super Administrator of the account can assign a role with Protected rights.

Assign a Role

1. Log into your Mimecast

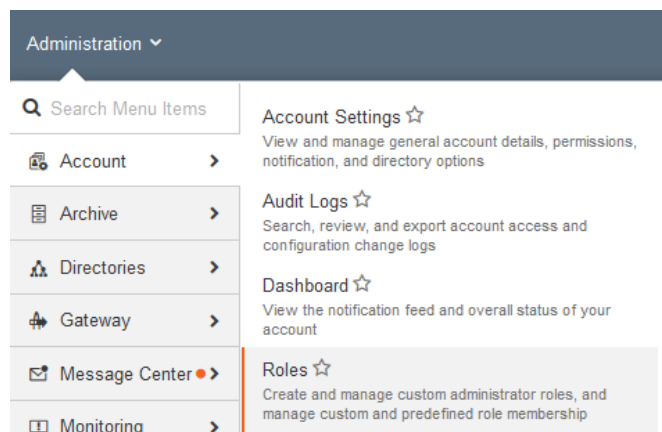

Account at

<https://login.mimecast.com>

2. Select Administration Console

3. Go to 'Administration > Account > Roles'

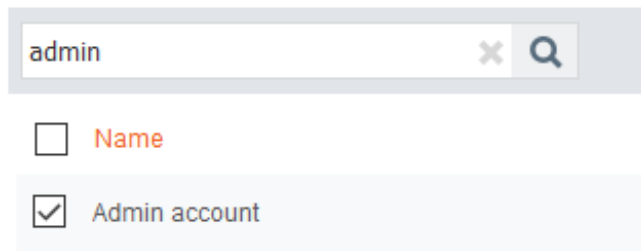

4. Click into the Role you want to assign

5. Select **Add User to Role**

6. Search for and tick the checkbox next to each user to add

admin

Name

Admin account

7. Press **Add Selected Users**
