

Register a New Domain

Last Modified on 11/11/2019 5:27 pm GMT

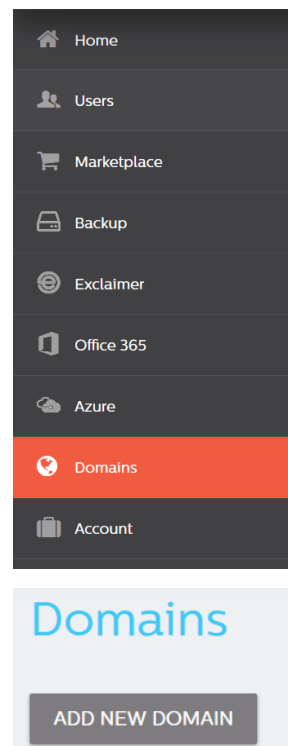

If you are looking to purchase a new domain to use with your services with Cobweb, you can use Cobweb CORE to order your new registration. You can then use Cobweb CORE to manage your domain with us.

If you already own your domain with another Provider, please see [Transferring your Domain to Cobweb](#).

For domains you can register with Cobweb, please see our [Supported TLDs list](#),

Register your Domain

1. Log into your Cobweb CORE Administrator account at <https://core.cobweb.com>
2. Select **Domains** from the Menu
3. Select **Add New Domain**
4. Select **Register New Domain**
5. Enter your domain name to register
6. Press **Check**
7. Select the Registration Period to register the domain for*

8. (.uk Domain Types) Enter the **Legal Type** details for yourself or your organisation

Note: This information must be accurate. Failure to provide accurate information may result in domain suspension.

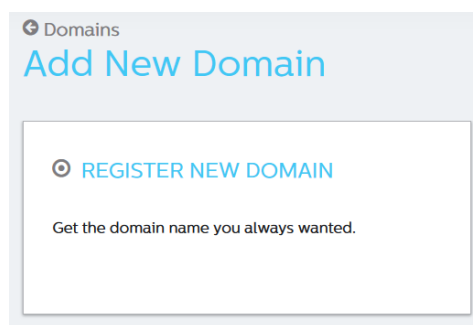

9. Press **Submit**

10. Press **Purchase**

*The domain will register for this initial period and auto-renew for the same length at the end of this period.

Once the domain registration is complete, you can start [adding your domain records](#).

After the registration is complete, you may receive a notification to your account from donotreply@name-services.com regarding verifying your Contact Information. This is part of the [Verification of Contact Information](#) process. You must respond to this request within 14 days, or your registration will be suspended until completed.
