

# Teams Admin Center

Last Modified on 27/02/2020 12:54 pm GMT

---

To manage your Teams configuration, you will need to access the Teams Admin Center.

The Teams Admin Center replaces much of the Skype for Business Admin Center (now known as the Legacy Portal).

You will need to have the Teams Service Administrator role to manage your Teams configuration.

## Access the Teams Admin Center

You can access the Teams Admin Center at <https://admin.teams.microsoft.com>.

You can also access it through the Microsoft 365 Admin Center.

- 
1. Log into your account at <https://office.com>
  2. Select the **Admin** app

**Note:** If you don't see the Admin App, you may not have permissions to see it or you may need to select **All Apps**.

3. Under Admin Centers, select **Teams**

**Note:** If you don't see Admin Centers, press **Show all**
